| Additional Comments: Chlorine analysis subcontracted to NATA accredited lab #2455, Certificate No. #B2262741 [R00].                |                |                                                                                                                           |                                               |                                                                                                    |                                 |                                                                                     |  |  |  |  |  |  |

Microbiological results expressed as cfu/g or cfu/ml (Colony Forming Units per gram or millilitre of sample analysed) unless otherwise specified.

*Disclaimer: Results pertain only to samples as received and tested in the laboratory.*

\*\* = Test not covered by the scope of accreditation

< = Less than

ND = Not Detected

LOD = Level of Detection

\* = Sub-contracted test

> = Greater than

DET = Detected

LLOQ = Lower Level of Quantification

\*\*\* = Matrix not covered by the scope of accreditation

# = Not Tested

ULOQ = Upper Level of Quantification
